ENM2

## Recommended use

With its standard enclosure, the ENM2 limit switch can be used universally in all industrial and safety applications.

## Product advantages

- Standard switch conforming to DIN EN 50041
- Standard actuator conforming to DIN EN 50041 (see page 15)
- Protection class IP 65 to VDE 0470T1
- Enclosure: Aluminium pressure die-casting
- Cover: Sheet aluminium
- Actuator can be repositioned by $4 \times 90^{\circ}$
- Cable entry M20 x 1.5
- Connection designation conforming to DIN EN 50013
- Metal actuators for high loads

## Options

- AS interface versions on request
- Preassembled with customer-specific cables and connectors on request

## Design layout

- Slow-action and snap-action contacts
- Versions: $1 \mathrm{NC} / 1 \mathrm{NO}, 2 \mathrm{NC}$, overlapping contacts
- All NC contacts with $\Theta$ in the circuit diagram are positively opening contacts
- Type: Zb (galvanically isolated changeover contact)

## Mounting

- Two M5 adjustment screws with slots
- Two M5 screws for safety applications without additional securing element

## Installation advantages

- Screw connections with self-lifting clamping plates
- Easy-to-change switching system thanks to snap-in retainer (depending on type)
- Finely adjustable switching point with adjusting screw
- Captive cover screws
- Enlarged connection space
- Earthing surface on same level as switching system

## Special features / variants

- Positively opening action, forward and return AHZ
- For special safety applications, the positive opening action of the normally-closed contacts takes place both in forward (moving in one direction) as well as in return (moving back to home position) direction
- For personal protection applications movement of the roller must be restrained in a guide block in both directions
