

# PINCH SOLENOID VALVE 2/2 – NO (Normally open)

S204

► **GENERAL FEATURES**

Pinch solenoid valve, suitable to shut off media without producing neither turbulent flows, nor dead spaces.  
High flow rate under the same conditions of internal diameter of different solenoid valves; the system allows a bi-directional through flow.  
The valves are suitable for soft SILICONE tubings or others, similar as to elasticity and hardness (50 shore A).  
**The tubing is the only material in contact with the fluid.**  
The tubings are not included in our supply.

► **INSTALLATION**

Solenoid valve can be mounted in any position.

► **NOTE**

- If the soft tubings are different from the ones indicated, it's important that the tubing minimum wall thickness is the same as shown in the table.
- For the use of a soft tubing with outside diameter smaller than 2,2mm it is necessary to install the tubing guide sleeve (drawing K29501).
- In case the tubing is not placed in its seat, the solenoid valve could operate incorrectly.
