

# Single point load cells

### **Special features**

**SP4M...** 

- Maximum capacities: 1 kg ... 200 kg
- **Aluminum**
- High ratio of minimum verification interval Y
- Off-center load compensation
- Shielded connection cable
- Ex protection designs as per IECEx, ATEX and FM (optional)

Dimensions in mm (1 mm = 0.03937 inches)

## **Specifications**

As per OIML R60, with P<sub>LC</sub> = 0.7
 Max. eccentric loading as per OIML R76.
 If the values for non-linearity (d<sub>lin</sub>), relative reversibility error (d<sub>hy</sub>) and temperature coefficient of sensitivity (TC<sub>S</sub>) are added together, they are within the cumulated error limit specified in OIML R60.
 As per OIML R76
 As per EN 60 529 (IEC 529)

 $<sup>^{1)}</sup>$  As per OIML R60, with  $P_{LC} = 0.7$ 

For further specifications, see Table SP4M..., Accuracy class C3 Multi Range (MR) (page 2)

#### **Cable assignment**

6-wire cable connection (24 AWG, available cable lengths: 1.5 m; 3 m; 6 m; 12 m)

As per OIML Rou, with FLC = 0.7
 Max. eccentric loading as per OIML R76.
 The values for non-linearity (d<sub>lin</sub>), relative reversibility error (d<sub>hy</sub>) and temperature coefficient of sensitivity (TC<sub>S</sub>) are recommended values. If these values are added together, they are within the cumulated error limit specified in OIML R60.

<sup>4)</sup> As per OIML R76

#### Mounting and load application

The load cells are firmly clamped at the mounting holes, the load is applied at the other end. The recommended screws and tightening torques can be found in the table below:

| Maximum capacities | Thread | Min. property class | Tightening torque <sup>1)</sup> |  |  |  |
|--------------------|--------|---------------------|---------------------------------|--|--|--|
| 136 kg             | M6     | 8.8                 | 6 N·m                           |  |  |  |
| 50200 kg           | M6     | 10.9                | 14 N·m                          |  |  |  |

<sup>1)</sup> Recommended value for the specified property class. Please comply with the screw manufacturer's instructions with regard to screw dimensions.

Load must not be applied to the side where the cable connection is located, as this would cause a force shunt.
