

# BELLOWS SEAL FLUID ISOLATION VALVES

- Chip/Wafer Manufacturing

- Waste Water Treatment

- Bellows system isolation valves designed for use with aggressive and corrosive liquids and gases in analytical instrumentation and the chemical manufacturing industries
- Large orifice sizes make these valves ideal for high flow-rate and high pressure applications
- Ideally suited for quickly flushing systems of corrosive media and routing aggressive reagents to chemical reaction vessels and waste containers
- Available in both 3-Way normally closed, normally open and universal versions; each with multiple connection options
- Meets all relevant CE directives, and is RoHS compliant
- Typical applications include:
  - Raw-material Chemical Manufacturing
  - Pharmaceutical

Fluids*	Temperature Range	Seal Materials*			
Air, Inert Gases, Water, Oil or Liquids	10 °C to 90 °C (50 °F to 194 °F)	FFKM (perfluoroelastomer)			

<sup>\*</sup> Ensure that the compatibility of the fluids in contact with the materials is verified

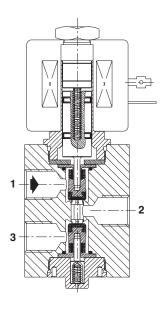

Materials in Contact with Fluid								
Body	PEEK or Stainless Steel, AISI 303 (1.4305)							
Others	Stainless Steel							
Seals	FFKM							
Bellows	PTFE							
Max. Viscosity	40 cSt (mm <sup>2</sup> /s)							

Electrical Characteristics									
Coil Insulation Class	F								
Connector	Spade plug (cable Ø6-10mm)								
Connector Specification	ISO 4400/EN 175301-803, form A								
Electrical Safety	IEC 335								
Electrical Enclosure Protection	Molded IP65 (EN 60529)								
Standard Voltages	24 VDC

<sup>1</sup> Including coil(s) and connector(s)

#### **Options**

- Valves can also be supplied with FKM (fluoroelastomer) and EPDM (ethylenepropylene) seals. Use the appropriate optional suffix letter for identification
- Plug with visual indication and peak voltage suppression or with cable length of 2m (78.7in)

## Installation

- The solenoid valves can be mounted in any position without affecting operation However, for optimum performance it is recommended that they be fitted with the solenoid operator at the top
- Solenoid valves have 4 mounting holes in body
- Pipe connection identifier is G = G (ISO 228/1)
